NOTES ABOUT SOY CANDLES

Soy wax is made up simply of soybeans. It is a vegetable wax that is completely renewable, making it one of the only sustainable and eco-friendly choices for candle making.

Soy candles burn cleaner, last longer, and hold more fragrance. They contain no toxic chemicals or carcinogenic compounds. Soy wax cleans up easily with soap and water.

Because they are 100% natural, soy candles can have bumpy tops, develop spots and frosting from scent oils, or pull away from the container. This is completely normal and does not affect the performance of the candle!
